

**Client Name: Axos Bank**

**CoreLogic® Valuation Solutions Client ID Number:** 3037965, 3037964

The following authorization permits Valuation Solutions to process credit card payments for all completed assignments. Please review this information and acknowledge your acceptance in the space provided below.

If using a borrower's credit card for payment, CLIENT certifies that they have requested and been given authorization from each individual borrower to utilize the credit card provided to Valuation Solutions for each transaction processed under the above-referenced Valuation Solutions Client ID. In addition, CLIENT agrees to guarantee payment on transactions placed if an individual's credit card is utilized and a chargeback is initiated by that individual. CLIENT is expected to notify the individual borrower that a charge will be placed on their credit card by Valuation Solutions for payment of a valuation product.

Due to the nature of the valuation process, once services have been initiated, charges are not subject to refund without authorization from Valuation Solutions. Once services have been completed and a verbal or written report has been delivered no refunds will be issued.

CLIENT also understands that using a debit card on quote-based products will result in a \$500 hold being placed on the card to ensure that adequate funds are available until the order completes. Upon completion the actual valuation product cost will be charged to the debit card.

As the designated client representative, I understand and agree to these terms and I authorize utilization of the credit card indicated on each order to cover the charges associated with the completion of a valuation product. I also acknowledge that I am authorized to make decisions on behalf of my organization.
